I am a Full Stack developer with over 3 years experience working as a freelance developer. I work frequently with React, Vue, NextJs, and NodeJs. I am passionate about learning latest developments and technologies, and creating exceptional solutions.

Professional Experience

Full Stack Web Developer

GIP Library | May 2021 - Present

Developed a full-stack modern admin dashboard with NextJs front-end, NodeJs back-end REST api, Mongo database, and AWS simple storage solution.

Developed and deployed a Nodejs application with CRUD functionality for creating and updating library resources.

Collaborated with designers and dev teams to design and implement user-friendly interfaces for external users.

Full Stack Developer

Fiverr, Nigeria | February 2019 - April 2021

- Developed an E-commerce website for a car dealership business using ReactJs for single-page interface and state management, Firebase for user authentication, Sanity for data management, and Stripe for payments.
- Developed a marketing website for a Fashion store with modern interface and advanced cart management functionality.
- Created user-friendly interfaces that enable users to understand how to use complex technical products.
- Implemented effective security protocols and data protection measures.
- Designed and implemented backend infrastructure and APIs that adhere to best practises.
